

Master's College Physics

Get an excellent start into your M.Sc. Physics with us. Most graduates from universities other than RWTH Aachen need to pass additional subjects as part of their admission's academic requirements. These courses are part of the German-taught Bachelor's degree in Physics. In the Master's College Physics, you can fulfill these academic requirements in specific English-taught courses even before your Master's program starts. Moreover, our complementing academic and social support will increase your chances of success.

Join the Master's College Physics and enjoy continuous support beyond a great head start for your studies!
